1 Introduction

The changes to the Financial Disclosure Management (FDM) application described herein were deployed to the Production environment on November 1, 2015. The modifications includes minor updates to the previously deployed OGE 278e filing form (FDM v7.0.2.2 deployed on September 20, 2015) to address bugs detected during the testing process and by users.

Previous release notes are posted on the FDM website at the following location:

2 Version 7.0.2.2.3 Defects and Changes

JIRA FDM-689

The legacy OGE 278 report included all ‘Comments of Record,’ which were comments inserted by the reviewer(s) and designated as Comments of Record. These notations were appended to the end of the legacy 278 report when it was displayed from the **View/Print** page. The 278e report did not include any comments that had been inserted by either the filer or reviewer(s). The only option available was to display a report that included all comments (both Of Record and not) from the **View/Print** page.

FDM v7.0.2.2.3 corrects this omission by including all comments designated by the reviewer(s) as ‘Public Annotations’ at beginning of the 278e report.

The figure below shows the **Add Comment** page with the free text field filled in and the ‘OGE 278 Record’ check box selected. (Note: the **Add Comment** page is accessible from multiple **Report Data** summary pages by clicking the **Add Comment** button to the right of each data record entry):

2.1 JIRA FDM-690

The supervisor signature, if used, was not displaying on the 278e reports. This is required for some but not all agencies.

This release includes the supervisor signature, if used, on the 278e report for filers under the “Other review conducted by” heading at the top of the report, in the same location that the reviewer signature is also displayed.

The following figure shows the placement and appearance of only the supervisor signature on a 278e report:
